SUMMARY

An inquisitive 23 year old computer science graduate from the Capital University of Science and Technology (CUST) seeking opportunities in the field of web design and development to expand my horizon of design and coding. With a strong foundation in programming and a keen eye for design, seeking a role in software, web, development role, product-related teams where strong technical skills and analytical thinking contribute to impactful solutions.

TOOLS & TECHNOLOGIES

C++	JavaScript	Python
HTML	MySQL	Figma
CSS	WordPress	Postman

EXPERIENCE

Frontend Internship

Feb 2025 - April 2025

Appic Solutions

- Assisted in developing responsive web pages and applications using JavaScript, HTML5, CSS3, and Bootstrap.
- Worked on dynamic user interfaces by implementing interactive elements with vanilla JavaScript (DOM manipulation, event handling, form validation).
- Collaborated with designers to transform UI/UX wireframes into functional web layouts.
- Improved website performance by reducing redundant code and applying best coding practices.

PROJECTS

Conference Management System - FYP Developed a conference management system with role-based access, paper review workflows, scheduling features, and integrated email scraping functionality using Go and MongoDB.	CODE
Online Market Place A fully responsive e-commerce website showcasing a variety of products. Developed with HTML, CSS, and JavaScript to provide smooth navigation and dynamic content display.	CODE
Pricing Panel Designed a visually appealing, responsive pricing panel for web applications. Utilized CSS Flexbox and Grid to create a clean layout and highlight different pricing options.	CODE
Tic-Tac-Toe Game Developed a classic Tic-Tac-Toe game playable in the browser using HTML, CSS, and JavaScript. Implemented turn-based logic, win detection, and a reset feature.	CODE
